### Transcrição:

**Kid:** There's a cardboard box and you climb into it and you teleport to anywhere.

**Adult:** That's cool!

---

**Adult:** There's been a lot of invention since I was a kid.

---

**Adult:** I think smartphones were a good invention.

---

**Kids:** We like computers!

---

**Kid:** I would like to see, like, this machine and you would type in what kind of food you would like, and then it just automatically falls out of the sky.

---

**Adult 1:** The egg. You get an egg...

**Adult 2:** He goes on about this all the time. An egg you put in an oven...

**Adult 1:** Egg. You put in an oven and it's a chicken.

**Adult 2:** I don't...

---

**Adult:** I think this invention's rubbish, but...

**Kid:** What about it could turn into any kind of pet?

**Adult:** Oh, see, that's much better, yeah.

---

**Kid 1:** Oh, no, what happened to my shoelace?

**Kid 2:** Me too!

**Adult:** Oh dear.

**Kid 1:** I'd like to see electric shoes.

**Kid 2:** The shoelaces would tie themselves.

---

**Adult:** So what I think would be really cool is a dream recorder, so when you wake up the next day you can watch your dreams again.

**Kid:** I don't know.

**Adult:** Have you ever had a really cool dream?

**Kid:m**Not really.

**Adult:** No? Maybe not for everyone.

**Kid:** The only things I kind of dream is bad dreams.

**Adult:** Oh, okay, you probably don't want to watch those back again, do you?

---

**Adult:** I've got one: conversation barometer. So you'd be on your date, whatever you're talking about it will be: 'Oh, yeah, great chat. Oh, not so good.'

---

**Adult:** If they had that chat meter right now, you are...

---

**Kid:** So if somebody drops litter, robots come out and arrest them.

**Adult:** I thought you're going to say: 'Robots come and pick up the litter', but no, they arrest.

**Kid:** And they pick up the litter.

**Adult:** Just eating my chocolate bar, throw the wrapper on the ground...

**Kid:** You're under arrest!

**Adult:** Oh, no, it's a litter robot! Did you throw the rubbish in the bin? Oh, good job, robot. Well done.

---

**Kid 2:** I thought of one: a flying car!

---

**Adult 1:** Air traffic control will have a very difficult time.

---

**Adult 1:** You'd find the car that flies scary?

**Adult 2:** Yes! You don't need to fly. Be happy on the ground.

**Adult 1:** So you're saying just a normal car.

**Adult 2:** Yes.

---

**Adult 1:** With SatNav it's very good, you can tell how long it's going to take.

**Adult 2:** Well, how come you're always late?
