

00:08

Wuhoo! Mr. Frog!

00:10

Are you alive?

00:12

Of course I am! Why wouldn't I be, huh?

00:16

See that friends?

00:18

Mr. Frog can breathe both inside and outside of water!

00:23

It is Magic Dr. Binocs, you won't understand. Hahah!

00:28

Well well, it's no Magic my friends.

00:32

It's just a way of life for some animals in the animal kingdom.

00:37

Come, let me tell you something about it.

00:40

Zoom in!

00:44

The Animal Kingdom is divided into two groups.

00:48

Invertebrates and Vertebrates!

00:51

But Today, we'll talk about the Vertebrates.

00:56

The Animals with a backbone are called Vertebrates.

01:01

Which are further split into smaller groups.

01:06

Amphibians!

01:07

Reptiles!

01:08

Birds!

01:09

And Mammals!

01:11

Now, let us explore a little into their worlds!

01:16

Amphibians!

01:18

Frogs and Salamanders are some of the most popular Amphibians.

01:23

They are the ones that can live both on land and water.

01:28

They are cold- blooded animals and lay eggs coated in jelly.

01:33

They have gills to breathe under water and lungs to breathe on land!

01:40

Reptiles!

01:42

Snakes and Crocodiles are examples of Reptiles

01:46

Their bodies are made of dry scales.

01:49

They lay their eggs on land and spend almost all their time under water.

01:56

They, too are cold blooded and it is only sometimes..

02:01

..that they come on to soak the sun!

02:06

Birds!

02:08

Oh, you've all seen Birds, haven't you?

02:11

Owls, Sparrows, Parrots, etc?

02:15

Well, they have feathers and wings.

02:18

But hey, not all birds fly!

02:22

They lay eggs that are hard shelled and are warm blooded.

02:28

Mammals!

02:30

Lions and pandas are examples of Mammals.

02:34

They give birth to young ones instead of laying eggs.

02:38

They have lungs to breathe and are warm blooded.

02:43

They have hair or fur.

02:46

And they have special glands to produce milk for their young ones.

02:50

Even Humans are Mammals!

02:53

Yes, you are!

02:55

Trivia Time!

02:57

Animals without a backbone are called Invertebrates...

03:02

...and they were the first animals to evolve.

03:06

There are approximately 52,000 species of Vertebrates.

03:12

So what are you waiting for?

03:14

Look around and start identifying!

03:18

This is me Zooming out!

03:21

Tune in next time for more fun facts!
